"Think of models as a way of ideating strategy. [A model is] a template: You use it at the beginning of the planning process. The idea behind a model is to tease out the ideas," says Tom Wright, CEO and Co-Founder of Cascade Strategy, a software company based in Sydney, Australia, with offices all over the world. "Frameworks are like a lens to help you see different perspectives, whereas ...

Project planning is the attempt to execute the project systematically by organizing people and resources, and dealing with uncertainty and risk. Ad-hoc planning remains unsuited for large and complex projects, and such projects require project planning models. Two of the most popular examples of such project planning models are PRINCE2 and PMBOK.
