In the case of a conflict or difference between the content of Airbus-WIN and the content published in the Airbus Flight Operations documentation at its latest revision, the latter shall prevail at all times

FLIGHT OPERATIONS SUPPORT AND TRAINING STANDARDS

TAROM Flight 371 was a scheduled international passenger flight, with an Airbus A310 from Otopeni International Airport in Romania's capital Bucharest to Brussels Airport in Brussels, Belgium. The flight was operated by TAROM, the flag carrier of Romania. On 31 March 1995, the Airbus A310-324, registered as YR-LCC, entered a nose-down dive after takeoff and crashed near Balotești in Romania.

The H160's standard-setting maintenance and support concept is among the aircraft's many innovations. It has undergone fine-tuning in an Operator Zero campaign with Airbus as the "first operator". It elevates commonplace needs like component accessibility to the fore. Its training and technical documentation are practical and visual.

Cockpit and avionics. The revised design of the cockpit dropped the A380-sized display and adopted 38 cm (15 in) LCD screens. The new six-screen configuration will have two central displays mounted one above the other (the lower one above the thrust levers) and a single (for each pilot) primary flight/navigation display, with an adjacent on-board information system screen.
