Carolyn M. Black, in Molecular Medical Microbiology (Second Edition), 2015. Clinical Diagnosis of LGV. Diagnosis of a suspicious case of LGV is based on the presentation of clinical features that include proctocolitis, inguinal lymphadenopathy, genital or rectal ulcers, especially after the exclusion of other aetiologies for these syndromes.

Inguinal Lymphadenopathy - an overview | ScienceDirect Topics

There are a few routes you could go down as a medical photographer. The most common option is to be part of a medical photography department. That would involve shooting a wide range of materials. It is standard for most hospitals to have their own private studio set up. Your day would include photographing various forensic patients.
