Repair & Overhaul | Cummins Inc.

Engine tuning is the adjustment or modification of the internal combustion engine or Engine Control Unit (ECU) to yield optimal performance and increase the engine's power output, economy, or durability. These goals may be mutually exclusive; an engine may be de-tuned with respect to output power in exchange for better economy or longer engine life due to lessened stress on engine components.

Engine tuning - Wikipedia

An Engine overhaul is removing, stripping, checkup, cleaning and repairing your engine. This is step for a mechanic to identify the problem with the engine in the easiest way. Parts that are defective are replaced. Once this is done, it is put back together and placed back inside your vehicle.

What is an engine overhaul? - Quora

There are several reasons why your engine might need a rebuild. Usually, an engine rebuild is preferred when your engine bearings are worn out and/or your piston or piston rings are failing or poorly seated. These things usually happen when your vehicle is not maintained properly or if it has already accumulated a lot of miles.
