In most cases, once your computer identifies the device, it will appear as another storage drive. If the ebook is in the PDF format and you want to read it on your computer, you'll need to have a free PDF reader installed on your computer before you can open and read the book.

Horses Oxen And Technological Innovation

The invention of the wheel was a major technological innovation that gave rise to chariot warfare. At first, equines, both horses and onagers, were hitched to wheeled carts by means of a yoke around their necks in a manner similar to that of oxen. However, such a design is incompatible with equine anatomy, limiting both the strength and mobility of the animal.

Horses in warfare - Wikipedia

The term rouncey (also spelt rouncy or rounsey) was used during the Middle Ages to refer to an ordinary, all-purpose horse. They were used for riding, but could also be trained for war.It was not unknown for them to be used as pack horses.The horse, which was also referred to as runcinus, is believed to be a harrowing animal on account of its proportions found in the demesne stock listing ...

The Colosseum: An Engineering Marvel of the Roman Empire

This is what happens when you take an intelligent person, and casually make a few mentions of a field of study they have no knowledge of. Mr. Diamond, NOT an anthropologist, takes Marvin Harris' theory of cultural materialism and uses it to explain everything in life, history, and the current state of the world. Materialism is a way of looking at human culture which, for lack of a better way ...

Agriculture is the art and science of cultivating the soil, growing crops and raising livestock. It includes the preparation of plant and animal products for people to use and their distribution to markets. Agriculture provides most of the world's food and fabrics.

Agriculture | National Geographic Society

Deserts are areas that receive very little precipitation. People often use the adjectives "hot," "dry," and "empty" to describe deserts, but these words do not tell the whole story. Although some deserts are very hot, with daytime temperatures as high as 54°C (130°F), other deserts have cold winters or are cold year-round. And most deserts, far from being empty and lifeless, are ...
