[eBooks] Th400 Rebuild Guide

Transmission brakes (transbrakes) have been available for the
TH400 for decades. The concept of using a transbrake is to
produce the fastest possible acceleration from a standing start.
Transbrakes are used specifically for drag racing. A transbrake is
activated by a driver-controlled switch that connects to a
solenoid mounted on the transmission. When engaged, the ...

Four "O" Transbrake Operation If your B&M Transmission is
equipped with a Four "O" Trans brake, carefully follow these
instructions for proper operation. The brake solenoid draw is 8
amps. Use a good quality release button and cord such as the
B&M #46004 or #46003. A 15 amp fuse is recommended to be
located between the transbrake switch
