Click Create a new Macro. An empty macro is created and added to the macro list. In the Name box, type the name of the new macro. Click in Editor, and enter your macro. You can record events such as keystrokes, mouse clicks, and delays between actions. You cannot capture mouse movement or actions performed through macros assigned to reassignable keys.

### How do I create macros?

Macro programs can affect the motions of the machine tool. They can also be used to change coordinate data and parameter settings. Any of these changes can cause unexpected motion, crashes, and other machine malfunctions. Always exercise caution and follow safe procedures for proving out new programs or edits to existing programs.

### SAS Training in the United States -- SAS® Macro Language 1 ...

Techopedia explains Macro Instruction. Macro instructions were first used in the assembler language rather than a higher-level programming language. The way a macro expands to a set of instructions depends on the macro definition, which converts the macro into its detailed instructional form. Macros save developers much time and effort, especially when dealing with a certain sequence of commands that is repeated more than once within the program body.
