The most common and useful cycloalkanes in organic chemistry are cyclopentane and cyclohexane, although other cycloalkanes varying in the number of carbons can be synthesized. Understanding cycloalkanes and their properties are crucial in that many of the biological processes that occur in most living things have cycloalkane-like structures.

The Borane Complex. First off it is very imporant to understand little bit about the structure and the properties of the borane molecule. Borane exists naturally as a very toxic gas and it exists as dimer of the general formula B 2 H 6 (diborane). Additionally, the dimer B 2 H 6 ignites spontaneously in air. Borane is commercially available in ether and tetrahydrofuran (THF), in these ...

In chemistry, specific rotation ([α]) is a property of a chiral chemical compound.: 244 It is defined as the change in orientation of monochromatic plane-polarized light, per unit distance–concentration product, as the light passes through a sample of a compound in solution.: 2–65 Compounds which rotate the plane of polarization of a beam of plane polarized light clockwise are said to be ...

(Everything in organic chemistry has complications!) Carbon-carbon single bonds are longer than carbon-carbon double bonds, so if there were "real" single and double bonds in the molecule, the shape of the benzene molecule would be a distorted hexagon: ... Alkanes. Alkanes are hydrocarbons in which the carbon atoms are held together by single bonds. Their general formula is C n H 2n+2 for molecules which do not contain ring structures.. Alkanes are in some respect the most boring of the organic compounds, since they are unreactive (mostly) towards acids, bases, oxidizing agents, reducing agents, and most of the other reagents that organic ...

Hydrogen iodide (H I) is a diatomic molecule and hydrogen halide. Aqueous solutions of HI are known as hydroiodic acid or hydriodic acid, a strong acid.Hydrogen iodide and hydroiodic acid are, however, different in that the former is a gas under standard conditions, whereas the other is an aqueous solution of the gas.
