They are narrated below: i. Heredity: Some hereditary traits bring a change from one individual to other.

Individual Differences: Meaning and Causes | Educational ...

Individual differences stand for the variation or deviations among individuals in regard to a single characteristic or number of characteristics. It stands for those differences which in their totality distinguish one individual from another. So, we can say that individual differences are the differences among humans that distinguish or separate them from one another and make one as a single unique individual.

What is Individual Differences, Causes & Types of ...

“The psychology of individual differences is largely the study of group differences. This study classifies individuals by age, traits, sex, race, social class and so on, and observes the differences within and between those groups. Physical, mental, social and cultural differences etc. are being studied, under individual differences.”
