The Most Popular Reading Programs Aren't Backed by Science

Science is built up of facts as a house is of stones, but a collection of facts is no more a science than a pile of stones is a house.. Henri Poincare, La Science et l'Hypothese (1908) Before one can discuss the teaching and learning of science, consensus is needed about what science is and why it should occupy a place in the K-8 curriculum.

2 Goals for Science Education | Taking Science to School ...

The Conservancy has always maintained that it is in the science business, not the beautification business; protected areas must be chosen for their scientific value, not for their scenic qualities or proximity to major population centers. In 1996, the Conservancy decided to abandon bucks and acres and to develop a better way of measuring success.

Measuring what matters in nonprofits | McKinsey

The purpose of science education is to develop scientific literacy, helping learners: to be interested in, and understand, the world around them; to engage in discourse about the scientific and technological aspects underlying global and local issues; to understand the testable and contestable nature of science, and question the claims made by others about scientific matters; to be able to ...

Every classroom has one - the over-achieving parent who makes everyone else look bad. There's the mother who has every event organized before you can get your foot in the door, and the father who outbids you at fundraising auctions. But relax! Becoming the teacher's pet needn't be expensive or time-consuming.
