MOKO has accumulated over 16 years of experience in electronic manufacturing since its establishment in 2006. We provide a full range of electronic manufacturing services including PCB prototype fabrication, assembly, electronics manufacturing, 3D printing, and other value-added services like surface finishing.

PCB Manufacturing & PCB Assembly Services - MOKO Technology

A printed circuit board (PCB) is a laminated sandwich structure of conductive and insulating layers. PCBs have two complementary functions. The first is to affix electronic components in designated locations on the outer layers by means of soldering. The second is to provide reliable electrical connections (and also reliable open circuits) between the component's terminals in a controlled ...
