NVDA is now the most commonly used screen reader among survey respondents. Notably, Narrator—freely available in Windows for several years—is the primary screen reader of only 1% of respondents, but commonly used by 30.3% of respondents (up from 21.4% in 2017). 72.5% of respondents use more than one desktop/laptop screen reader.

WebAIM: Screen Reader User Survey #8 Results

The so-called common factors have a long history in psychiatry, originating with a seminal article by S. Rosenzweig in 1936 and popularized by J. Frank in the various editions of his book *Persuasion and Healing* (2–4). During this period, the common factors have been both embraced and dismissed, creating some tension (5–9). The purpose of this paper is not to review or discuss the debate, but ...
